

FIG.1

FIG.2

A detailed technical line drawing of a mechanical device, likely a portable engine or pump. The device consists of a main body (2) with a handle (7) and a base (1). The handle is connected to a lever arm (19) which is pivoted on a base. The lever arm is connected to a piston rod (20) which is part of a piston and crank mechanism (21). The piston and crank mechanism is housed within a cylinder (25). The main body (2) contains various internal components, including a pump or engine mechanism (30) and a control valve (3). The device is shown in a side view, with dashed lines indicating the internal components and the handle's movement.
